

Dear Students/Parent(s) & Guardian(s),

Below you will find all of the concepts that will be on the Unit 1 Assessment, which we will start taking **the week of October _____, 2018**. We will review some mathematical concepts in class; however, it is your (the student's) responsibility to look through the following problems to prepare yourselves, and/or come to me with any questions. I am always here to help.

Take your **SRB home as a guide** and **review previous Math Journal problems** for specific examples. Journal pages for problems can be found below. If anything is confusing, mark it with a star and we can do it together. As always, please come to me with any questions or concerns you may have. Good Luck! 😊

Unit 1 Assessment

- Recognize, explain and write a statistical question:** MJ page(s): 2, 5-6, 26
- Find the mean, median, mode and range of a data set:** MJ page(s): 13, 16, 25, 29
- Choosing the right landmark for a data set based on context :** MJ page(s): 16-17
- Read and make a dot plot and a histogram:** MJ page(s): 5-6, 28, 50 & S.L. 1.7
- Interpret a persuasive graph:** MJ page(s): 19-22
- Use graphs to ask and answer questions. Describe overall patterns:** MJ page(s): 29-31
- Order Rational Numbers on a number line and find rational numbers between numbers:** MJ page(s): 35, 47
- Plot ordered pairs of rational numbers on a coordinate grid:** MJ page(s): 49-50
